## Blocked Sites

Add site(s) to block in the text box below, then click "Add Blocked Site(s)".

- To block multiple sites, add one per line.
- Do not type the http://
- If you want to block the entire site, leave off the www (i.e. cnn.com instead of www.cnn.com)
- You can use a preceding asterisk as a wildcard (i.e. \*.com blocks all .com sites, or \*foo blocks all domains with the word "foo" in them)

*Want some suggestions of sites you should block? [Check out this list.](#)*

*Want to stop yourself from disabling StayFocusd? [Block the Chrome Extensions page!](#)*

### The Stalker Option

Keep the StayFocusd timer running while visiting links from blocked sites, even if those sites aren't blocked.

## Parents: How to raise a creative genius

 [cnn.com/2010/HEALTH/10/22/motivation.kids/index.html](http://cnn.com/2010/HEALTH/10/22/motivation.kids/index.html)

### STORY HIGHLIGHTS

- A combination of heredity and unique characteristics of the individual contribute to creativity
- Parents should cheer on their children but should not be attached to outcomes
- Some kids will drop an activity if they believe their parents have too many expectations about it
- Check out [CNN's Geek Out](#)

### RELATED TOPICS

**(CNN)** – When Gavin Ovsak started multiplying double-digit numbers in his head in kindergarten, his mother, Cathy, was astonished.

"We were like, where did that come from? When did they cover that today?" said his mother, who lives in Hopkins, Minnesota.

Today, Gavin is a 16-year-old award-winning inventor who's finishing up applications for two prestigious science competitions. His entry is the [Circuit-Hat Accessibility Device](#), an electronic hat that allows disabled people to use a computer without a mouse. When he's not working on these kinds of projects, he's performing improv comedy, leading a robotics team and heading his school's foreign exchange club – and, of course, homework.

What motivates this passion for learning and achievement? Gavin says that he has a natural drive to challenge himself and help

## Quantum computer

From Simple English Wikipedia, the free encyclopedia

The English used in this article or section **may not be easy for everybody to understand**. You can help Wikipedia by reading [Wikipedia:How to write Simple English pages](#), then simplifying the article. (January 2012)

A **quantum computer** is a model of how to build a computer. The idea is that quantum computers can use certain [phenomena](#) from [quantum mechanics](#), such as [superposition](#) and [entanglement](#), to perform operations on [data](#). The basic principle behind quantum computation is that quantum properties can be used to represent data and perform operations on it.<sup>[1]</sup> A theoretical model is the [quantum Turing machine](#), also known as the universal quantum computer.

The idea of quantum computing is still very new. Experiments have been done. In these, a very small number of operations were done on [qubits](#) ([quantum bit](#)). Both practical and theoretical research continues with interest, and many national government and military funding agencies support quantum computing research to develop quantum computers for both civilian and military purposes, such as [cryptanalysis](#).<sup>[2]</sup>

Today's computers, called "classical" computers, store information in binary; each bit is either on or off. Quantum computation use qubits, which, in addition to being possibly on or off, can be both on and off, which is a way of describing superposition, until a measurement is made. The state of a piece of data on a normal computer is known with certainty, but quantum computation uses probabilities. Only very simple quantum computers have been built, although larger designs have been invented. Quantum computation uses a special type of physics, [quantum physics](#).

The **Bloch sphere** is a representation of a qubit, the fundamental building block of quantum computers.

# WORK ENVIRONMENT

## Thank you for installing f.lux

f.lux automatically warms up your computer's screen colors at sunset and returns them to normal at sunrise.

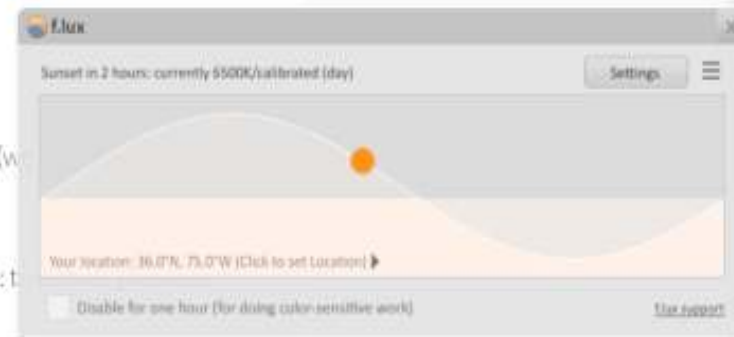

You can change colors, location, and other settings from the f.lux menu.

*The f.lux menu is always located to the left of your system clock.*

## Some tips for getting started

1. Set your location: f.lux works a lot better if it knows exactly where you are (well, it's not always good.)
2. Adjust f.lux's color settings so it looks as warm as you like it.
3. Expand your color range so you can try even warmer colors at night. (Note: this requires Administrator access plus a reboot, but it's really worth it.)
4. Disable f.lux to edit pictures: Alt-End.

<https://justgetflux.com/>

The screenshot shows the Coffitivity website. At the top left is the Coffitivity logo. The navigation menu includes Premium, About, Research, Contact/Support, and Blog. A Login button is in the top right. On the left side, there is a music player with a play/pause button, a volume slider, and a 'CAFE LIBRARY' section. The library lists five tracks: Morning Murmur, Lunchtime Lounge, University Undertones, Paris Paradise, and Texas Teahouse, each with a description and a star icon. Below the library is a 'GO OFFLINE' button. The main content area features a 'Welcome to Coffitivity!' message with an illustration of a person at a laptop, followed by a paragraph about the service and a link to research. Below that is a 'Take Coffitivity Offline Today' section with a paragraph about an offline app and a 'See It Now' link. At the bottom right, there is a red heading 'Updates To Come! Part 1'.

Coffitivity

**Updates To Come! Part 1**

<http://coffitivity.com/>

<http://www.noisli.com/>

# <https://mynoise.net/NoiseMachines/space-shipNoiseGenerator.php>

The screenshot shows a web interface for a noise generator. At the top, it says "Warp Speed" and "Sci-Fi Background Noise Generator". Below this are ten vertical sliders with colored knobs (brown, red, orange, yellow, green, cyan, blue, purple, magenta, pink) for adjusting different sound parameters. A play button is highlighted in orange. Below the sliders are icons for settings, volume, and other controls. The text "Press Play to resume" is visible. On the left, there are social media icons for YouTube, Twitter, Facebook, and SoundCloud. The background features a space-themed image of a planet and a nebula.

**The Soundscape for Science Fiction fans**

Star Trek's Enterprise engine noise has been a recurring request. A slight problem delayed its release: our user interface had more sliders than it needed to recreate the sound! ;) So, instead of designing just an engine noise, we decided to throw some extra sounds and turn the engine noise into a fully featured intergalactic experience. This soundscape has all the background noises needed to immerse yourself in a classic Sci-Fi movie soundtrack. For the TOS fans, we even added those fluttery vintage synth tones, reminiscent of how the future was perceived like... back in the sixties!

If you plan to listen to the soundscape for more than 24 hours in a row, please consider donating to support the project.

Image from <https://lifehacker.com/transform-youtube-into-a-distraction-free-audio-player-1840433095>

<http://www.getworkdonemusic.com/>

The image shows a music player interface. At the top, there is a brown banner with the text "GET WORK DONE MUSIC" in white, bold, sans-serif font. To the right of the text is a play button icon and a volume slider. Below the play button are two buttons labeled "FAST" and "FASTER".

Below the banner, there are social media sharing options: "Follow @Music4Working" with "492 followers", "Tweet", "Like 9.6K", and "LinkedIn".

The main content area shows a progress bar for the track "Atma - Spiritualism & Love (144 Bpm Remastered)" with a duration of "-6:19".

At the bottom right, there is a text prompt: "gimme the next one cap'n »".

<https://window-swap.com>

# Organize Chrome tabs!

The screenshot shows a Chrome browser window with multiple tabs. A tab group labeled "Tools presentation" is selected, and a context menu is open over it. The menu options are: "New tab in group", "Ungroup", "Close group", and "Move group to new window". The background shows a Wired article titled "Browser Options".

## Browser Options

Google recently introduced a new feature called [Tab Groups](#) that makes it easier to manage different bunches of tabs in Chrome. Try right-clicking on a tab and choose **Add tab to new group**—the tab will be assigned a colored dot, and you can give it a name and change its color by right-clicking on the dot. You might have different groups for different projects maybe, or one for personal stuff and one for work-related browsing. (If you don't have it yet, make sure you have the latest version of Chrome first, and then you may need to enable it in the "chrome://flags" experimental options.)

You can expand or collapse tab groups by clicking on their label. To add new tabs to a group, just drag them in, or right-click on a tab and choose **Add tab to group** (you can still create new groups too). Drag tabs out of the group,

**PASSWEIRD**  
PASSWORDS TOO GROSS TO STEAL.

Welcome,  
This website will create for you a password that is not only secure\*, but is also so utterly repulsive that not even the most hardened criminal, identity thief, NSA agent, or jealous boyfriend would ever want to use it.

**GENERATE PASSWEIRD**
